Report of CAC members voting No:

CAC Member West: Not sure exactly what's the point or the ramification of conservation overlay are, not comfortable voting for it.

CAC Member Anderson: Though the conservation overlay on Change Area 9 was vague. The only habitat in there was the garter snake and don't know how you pick one overlay. It didn't seem like enough scientific research went into it.

CAC Member Dawson: Conservation overlay districts should be determined by the Army Corps of Engineers and State entities. Don't like putting overlays on different properties.
